

Traditional Picket Fence

The Casa Verde low profile picket fence is made from a maintenance free material that looks and feels like wood. This is not a flimsy flexible fence section so often seen in today's market. The heavy-duty design will hold up to the harshest environment including wind, rain, salt air, freezing temperatures and rowdy pets. Unlike wood or metal, it will not rot, rust or splinter. The 3' sections are easy to install, no digging necessary, just gently tap pointed ends into the ground.

Our classic design fits into any landscape and is ideal for enhancing and protecting flowerbeds, shrubbery and trees.

Features:

- UV protected
- Looks and feels like wood
- Maintenance free
